

## TotalEnergies Premium Wood Pellets packaging now made of 50% recycled polymers from the RE:clíc range

**Brussels, June 28, 2023** – The TotalEnergies Premium Wood Pellets are now packed in high-performance polyethylene bags incorporating 50% post-consumer recycled (PCR) materials.

The new innovative packaging is composed of a core layer of rPE2206, a low-density polyethylene (LDPE) grade made of 100% PCR content and part of the RE:clíc circular polymer range, and high-performance Lumicene® and Supertough® metallocene virgin resins. It exhibits identical properties and thickness as fossil-based alternatives with a significantly reduced environmental footprint. Moreover, the printed area of the packaging has been reduced by 60% to improve recyclability and limit ink usage.

This development is the result of an internal effort within TotalEnergies to implement the circular economy in our own use of plastics.

*“This project is a great illustration of our commitment to promote sustainability as a Company, by implementing our own innovative developments in our businesses. It contributes to addressing the challenge of end-of-life plastics and marks yet a new milestone in our ambition of producing 30% circular polymers by 2030,”* said **Olivier Greiner, Vice President, Polymers Europe & Orient at TotalEnergies.**

*“Our customers choose TotalEnergies Pellets Premium as heating energy because it is both a cost-effective and sustainable solution. The new packaging co-developed with the Polymers Division facilitates recycling and helps reduce the carbon footprint of our activity,”* said **François Boussagol, General Sales Manager, Marketing & Services France at TotalEnergies.**

## About TotalEnergies and Polymers

TotalEnergies develops, produces and commercializes polymers — polyethylene, polypropylene, polystyrene, their recycled equivalents and biopolymers — that can be incorporated in the plastics manufacturing process. Lighter than many alternative materials, they help reduce the carbon footprint of end-use applications through enhanced energy efficiency. TotalEnergies' polymers experts in Europe, Asia and the United States of America are working alongside all the professionals in the value chain, including plastic manufacturers, research centers, waste collection and sorting companies, and their customers to accelerate in the circular economy. The Company is developing different plastic recycling processes and using renewable raw materials, with the ambition to commercialize 30% circular polymers by 2030.

## About TotalEnergies

TotalEnergies is a global multi-energy company that produces and markets energies: oil and biofuels, natural gas and green gases, renewables and electricity. Our more than 100,000 employees are committed to energy that is ever more affordable, cleaner, more reliable and accessible to as many people as possible. Active in more than 130 countries, TotalEnergies puts sustainable development in all its dimensions at the heart of its projects and operations to contribute to the well-being of people.
